

MUJEEB UL HASSAN

SOFTWARE ENGINEER • FULL-STACK, AI & MOBILE DEVELOPER

Location: Kunjah, Gujrat, Pakistan (Available Worldwide / Global Remote) | **Email:** hassansajid098@gmail.com | **Phone:** +92 318 7121697

GitHub: github.com/hassan-bytes | **LinkedIn:** linkedin.com/in/mujeeb-ulhassan-techsphere-712402246

PROFESSIONAL SUMMARY

Results-driven Software Engineer with a BS in Information Technology (Software Engineering & AI) from the University of Gujrat. Proven track record of delivering 10+ end-to-end full-stack web platforms, cross-platform mobile apps, and AI/ML solutions for international clients across food tech, e-commerce, fitness, and administrative sectors. Proficient in React, Node.js, Python, Flask, Flutter, React Native, SQL, Supabase, and On-Device LLM integration. Adept at managing complete project lifecycles from architecture wireframing and API engineering to cloud deployment and support.

TECHNICAL SKILLS & COMPETENCIES

AI & Machine Learning:	On-Device LLMs (Qwen2.5 via llama.rn), Hugging Face, RoBERTa NLP Classifier, AI-Content & Plagiarism Detection, Prompt Engineering, Flask ML Backends, AI Voice NLP.
Web & Full-Stack:	React.js, JavaScript (ES6+), HTML5, CSS3, Node.js, Express.js, WordPress (Custom Themes & Plugins), RESTful APIs, WebSockets, Supabase (Postgres/Auth).
Mobile App Development:	Flutter & Dart, React Native (Expo), Cross-Platform iOS & Android, State Management, Offline-First Architectures, Live Step Tracking / Sensors.
Databases & Cloud:	Supabase (PostgreSQL), Firebase, MySQL, SQLite, Linux Server Administration, Git/GitHub, Vercel, Netlify, Cloud Deployment.
Professional Practices:	Software Architecture, Agile/Scrum, End-to-End Delivery, Client Communication, IT Systems Documentation, Team Leadership.

PROFESSIONAL EXPERIENCE

Freelance Software Developer <i>Self-Employed • Remote (International Clients)</i>	2022 – Present Gujrat, Pakistan
- Successfully delivered 10+ web and mobile software projects for clients in food tech, fitness, e-commerce, and enterprise operations. - Developed full-stack web applications in React.js and Node.js with secure REST APIs, role-based authentication, and automated data pipelines. - Built cross-platform mobile apps in Flutter and React Native (Expo) incorporating live sensors, Supabase real-time databases, and on-device AI LLMs. - Integrated Python-based machine learning pipelines with Hugging Face transformers for real-time text classification and NLP tasks. - Managed complete project lifecycles from requirements gathering and Figma prototyping to production deployment, handover, and post-launch maintenance.	
IT & Administrative Intern <i>Punjab Police • Departmental Operations</i>	2024 Gujrat, Pakistan
- Maintained digital reporting systems and verified operational records across multiple administrative units with 100% record accuracy. - Streamlined routine IT workflows, database entries, and documentation protocols to facilitate fast data retrieval for leadership reviews. - Collaborated with departmental teams to ensure compliance with digital management and reporting standards.	

KEY FEATURED PROJECTS

SaySavor – Full-Stack Web Food Ordering Platform (Final Year Project)	React • Node.js • Flask • AI Voice • REST API
- Engineered a full-stack food ordering platform featuring a React web administration portal and a hands-free conversational AI voice assistant. - Implemented a dedicated Node.js & Flask backend with natural language voice processing for menu recommendations, cart operations, and live order tracking.	
FitPulse – Fitness Hub with On-Device AI Coach	React Native (Expo) • Qwen2.5 • Supabase • Node.js
Built an iOS/Android fitness application featuring workout/diet tracking, real-time pedometer analytics, and a 100% on-device private AI coach (Qwen2.5 via llama.rn).	

- Configured Supabase (PostgreSQL, Auth, Storage) and a Node.js/Express computational layer for zero cloud LLM latency.

AI Content & Plagiarism Detector

Python • Hugging Face RoBERTa • Flask • Chrome Ext

- Developed a real-time Chrome extension powered by a local Flask ML backend to detect AI-generated content using a fine-tuned RoBERTa classifier.
- Integrated PyMuPDF for document text extraction and SearxNG meta-search engine for live plagiarism comparison and similarity scoring.

GroceryHub & GrociGo – Grocery Delivery Web & Mobile Platforms

React.js • Flutter • Supabase • Real-Time Sync

- Built two commercial platforms: a React web store with instant search and Supabase-backed inventory, and a Flutter mobile app with real-time delivery tracking.

EventFit – Fitness & Event Booking Service

Node.js • Express • SQL • RBAC Security

- Engineered a high-throughput booking backend with relational SQL schemas, JWT security, and Role-Based Access Control separating admins from participants.

EDUCATION & CREDENTIALS

Bachelor of Science in Information Technology (BSIT)
Specialization: Software Engineering & Artificial Intelligence
University of Gujrat, Hafiz Hayat Campus • Gujrat, Pakistan

2022 – 2026

FSc Pre-Engineering • ILM Group of Colleges, Gujrat

2020 – 2022

Certifications: Google Professional Credentials in Python & AI Productivity Tools | **Languages:** English (Fluent, B2/C1), Urdu (Native, C1)
